

In Vitro Diagnostic Reagent

Hemolysing Agent-LG1

Used prior to blood cell analysis to lyse red blood cells, release hemoglobin and preserve the morphology of the cells to be analyzed, thus facilitating cell differentiation and counting or quantitative determination of hemoglobin

Product Photo

Product Model	Hemolysing Agent-LG1
Packaging Specifications	200 mL, 500 mL, 1 L, 5 L, 10 L, 20 L
Product Code	p1264

Intended Use

Used prior to blood cell analysis to lyse red blood cells, release hemoglobin and preserve the morphology of the cells to be analyzed, thus facilitating cell differentiation and counting or quantitative determination of hemoglobin

Principle

It lyses red blood cells while keeping the morphology of white blood cells unchanged, enabling the analyzer to count white blood cells by the impedance method...
