

In Vitro Diagnostic Reagent

Concentrated Diluent-BCII

It is used to dilute the whole-blood sample to be tested and, together with the blood analyzer or reagents, to detect the substance to be measured; clinically, it is used prior to blood cell analysis to prepare a cell suspension by diluting the sample

Product Photo

Product Model	Concentrated Diluent-BCII
Packaging Specifications	500 mL, 1 L, 2 L, 5 L, 10 L, 20 L
Product Code	p1280

Intended Use

It is used to dilute the whole-blood sample to be tested and, together with the blood analyzer or reagents, to detect the substance to be measured; clinically, it is used prior to blood cell analysis to prepare a cell suspension by diluting the sample

Principle

It dilutes the blood cells, enabling the analyzer to count and classify the blood cells by the impedance method

Composition

Sodium chloride, preservatives...
