

In Vitro Diagnostic Reagent

Hemolysing Agent-LD68P

Used prior to blood cell analysis to lyse red blood cells and preserve the morphology of the cells to be analyzed, thus facilitating cell differentiation and counting

Product Photo

Product Model	Hemolysing Agent-LD68P
Packaging Specifications	500 mL, 1 L, 4 L, 20 L
Product Code	p1304

Intended Use

Used prior to blood cell analysis to lyse red blood cells and preserve the morphology of the cells to be analyzed, thus facilitating cell differentiation and counting

Principle

During blood cell testing, red blood cells are lysed, and the white blood cells are treated to a certain extent to increase the differences between white blood cell subpopulations, thereby promoting the staining by Stain Solution-FD68P...
