

In Vitro Diagnostic Reagent

Stain Solution–FD68P

Used to stain blood cells so that their morphology and structure can be observed, enabling the blood analyzer to perform blood cell differentiation and counting

Product Photo

Product Model	Stain Solution–FD68P
Packaging Specifications	12 mL, 12 mL × 4, 48 mL, 48 mL × 4, 1 L, 2 L
Product Code	p1310

Intended Use

Used to stain blood cells so that their morphology and structure can be observed, enabling the blood analyzer to perform blood cell differentiation and counting

Principle

During blood cell testing, the stain solution–FD68P stains the white blood cells with the aid of the hemolysing agent–LD68P and, in combination with laser light scatter and fluorescence staining...
